Career Objective

Currently gaining hands-on experience in Product and AdTech at Grameenphone, working across digital advertising, audience analysis, product ideation, and cross-functional initiatives. I enjoy understanding how technology, data, and user behavior come together to create better products and experiences. Alongside my technical background, my experience in teaching, leadership, and presenting ideas has strengthened my communication, collaboration, and ability to work with diverse teams.

TECHNICAL SKILLS

Programming Languages: Python, C/C++, JavaScript, SQL, and HTML.

Data Science & Machine Learning: Deep Learning, Reinforcement Learning (Q-Learning), Computer Vision, and Data Analysis.

Web Development & Databases: PostgreSQL, (Database Normalization, ER Diagram, Schema).

Tools & Technologies: SUMO, Docker, Power BI , LaTeX, and GitHub, 3D printings.

Software Proficiency: Microsoft Excel, PowerPoint, and fundamental computer operations.

Education

2022–2026	**B.Sc. in Computer Science**, BRAC University, Dhaka	**CGPA: 3.91**
2020	**Higher Secondary Certificate**, Rajshahi Government City College	**GPA: 5.00**
2018	**Secondary School Certificate**, Rajshahi Cantonment Public School and College	**GPA: 5.00**

Experience

AdTech Product Intern, Grameenphone, Dhaka

June 2026 – Present

- Developed an AI-powered reporting automation solution to streamline post-campaign analytics, reducing a **manual 2–3 hour reporting process to minutes** while improving consistency and scalability.
- **Structured 100+ commercially viable audience segments** using Grameenphone's first-party telco data to support targeted digital channel expansion and audience-based campaign planning.
- **Configured and executed 15+** digital campaigns across platform placements (MyGP, Skitto, Bioscope+, Cockpit), driving end-to-end service delivery and user adoption.
- Engaged directly with clients and 21 major brands to present digital solutions, negotiate requirements, and drive lead-generation campaigns.
- Monitored digital campaign performance through core KPIs (revenue, CTR, engagement), supporting partner optimization and regional rollout strategies.
- Analyzed user behavior on the MyGP platform to identify engagement bottlenecks and designed ATL/BTL promotional concepts around daily rewards to drive active participation.

IT Intern, City Bank, Dhaka

May 2026 – June 2026

- Resolving software, and OS-related issues for bank employees while managing system configurations and security updates.
- Assisting in the maintenance and troubleshooting of local area networks (LAN) to ensure stable and secure connectivity across departments.

Undergraduate Teaching Assistant, BRAC University, Dhaka

Nov 2024 – May 2025

- Assisted faculty across **2 lab courses**, conducting weekly tutorials and grading assignments for **35+ undergraduate students.**
- Held regular office hours to clarify course concepts and managed lab logistics and submission portals to streamline grading for large student cohorts.

Academic Course Projects, BRAC University

- Developed a PCA-based ML pipeline using clinical and gene-expression data to classify seven cancer types, achieving 93.07% test accuracy with Logistic Regression. -Github
- Designed EfficientCNN, a lightweight CNN for Bangla handwritten digit recognition on the BHaND dataset, achieving 99.78% test accuracy and outperforming AlexNet, LeNet-5, and MobileNetV2 baselines. -Github
- Built a machine learning flood-prediction pipeline to classify evacuation requirements using rainfall, river level, soil moisture, and flood-risk features across multiple ML models. -Github
- Analyzed E-commerce sales data and created a interactive dashboard using Power BI -Github
- Developed a Software Course Management System using Next.js and MongoDB -Github

Thesis/Research

Adaptive Traffic Signal Control for Urban Intersections Using Reinforcement Learning: A SUMO Simulation Case Study on Gulshan-2

- Built a disruption-aware evaluation framework on a GIS-based Gulshan-2 SUMO model using published field-demand data, testing controllers under both normal and anomaly conditions (potholes + jaywalking) and highlighting robustness as a core contribution beyond ideal-condition performance.

Interests

Data Science, Digital Media Buying, AdTech, Data Analysis, Machine Learning, Deep Learning, Robotics, Database Systems, Cybersecurity.

sectionLeadership & Activities

Volunteer Instructor – Project Srijon, BRAC University Sep 2022 – Dec 2022

- Taught basic computer skills (MS Office and daily computer use) to **60+** underprivileged children over **10** weeks.
- Guided **30** students per class, helping **90%** of them finish the course and learn to use computers easily.

Executive Committee Member – Nissorgo Foundation Nov 2020 – Dec 2023

- Served on the core leadership team to plan food drives, giving daily Iftar to 50+ poor people during Ramadan and food packages to 80 families during Eid.
- Led winter help programs that bought and handed out 200+ warm blankets to people in need each year.
- Organized blood donation campaigns that tested and saved blood group info for 350+ people into a database, while personally donating blood 20 times.

Honours & Awards

- Recipient of the **Vice Chancellor's List** in **6 semesters** and the **Dean's List** in **3 semesters** for outstanding academic performance.
- Awarded a **50% tuition scholarship** at BRAC University in recognition of consistent academic excellence.
